Proper Blood Pressure Cuff Sizing

Index line at cuff edge should fall within the Range arrows.

IF white Index line does not reach first Range arrow, select a larger cuff.

⚠️ Using a cuff that is too small (undercuffing) can result in overestimating a patient’s BP.

IF white Index line reaches past second Range arrow, select a smaller cuff.

⚠️ Using a cuff that is too large (overcuffing) can result in overestimating a patient’s BP.

BE SURE TO USE APPROPRIATE SIZE CUFF FOR YOUR PATIENT.
(See chart below for cuff size options. Be sure to select appropriate connector.)

Cuff Size - Color/Limb Circumference
