A Note about the ADC Adviev 2 Modular Diagnostic Station

To Our Valued Dealer Community:

We're writing to share that the components we require to manufacture the Adviev 2 ChipOx Nellcor-compatible SpO2 module are no longer available.

As a result, new purchases of the Adviev 2 Modular Diagnostic Station that include this component will be automatically upgraded to a Masimo SET SpO2 module. This upgrade, valued at over \$700, will be provided at no additional charge. The module includes an adult finger sensor and extension cable.

Customers can continue to order the same models as in the past. ADC will process the upgrade and include a note about the change with any affected shipments.

If you have any questions or require further clarification, please contact your ADC sales representative or Customer Service at 1-800-ADC-2670 or info@adctoday.com. More information about the Adviev 2 can also be found at www.adctoday.com/products/Adviev2.

Thank you for your continued partnership.

Sincerely,
American Diagnostic Corp.

Steve Kelly
